| Order-176 ⋮ Arrange Pickup Prashant High Priority | Due Tomorrow ✍ Start: Sep 1 ✍ 🔵 Start Task |

Your assignment is to build an interactive task list screen in Flutter based on the provided UI screenshot.

Core Requirements

Build a screen that displays a list of tasks. The appearance of each task card must visually change based on its status (e.g., 'Not Started', 'Started', 'Completed').

Implement the following interactions:

- **Start Task:** A "Not Started" task needs a "Start Task" button. Tapping it should change the task's status to "Started" and update the UI.
- **Mark as Complete:** A "Started" task needs a "Mark as Complete" button. Tapping

it should change the status to "Completed" and update the UI.

- **Edit Deadline:** Tapping the date on any active task (i.e., "Not Started" or "Started") must open a date picker. Saving a new date should update that task's start date and refresh the UI.
- **Edit Icon for Start Date:** An edit icon must be displayed next to the start date **only** for tasks that have a "Not Started" status.

Technical Specifications

- **Language & Framework:** Use **Dart** and **Flutter**.

Submission

Please submit the following:

1. A link to a public **GitHub repository** with your source code.
2. A brief **screen recording** (video or GIF) of your completed application in action.
